## WHAT IS THIS PRODUCT?

### TYPE

Carmignac Portfolio Tech Solutions is a segregated sub-fund of Carmignac Portfolio SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

### TERM

The SICAV was launched on 30/06/1999 for unlimited period. The sub-fund was launched on 21/06/2024.

### OBJECTIVE

The sub-fund aims to outperform its reference indicator (the MSCI AC World Information Technology 10/40 Capped NR Index) over a period exceeding five years. In addition, it seeks to invest sustainably for long-term growth.

The Sub-Fund's investment strategy is to invest primarily in the information technology sector, including, for example, companies active in software, computer manufacturing, communication equipment, semiconductors and IT services. At least 51% of the portfolio is invested in global equities in the information technology sector, without restrictions in terms of allocation by geographical zone or market capitalisation. The investment in equity markets in emerging countries does not exceed 30% of the Sub-Fund's net assets. The Sub-Fund's net assets may be invested on an ancillary basis in money market instruments, negotiable debt securities, and fixed or floating rate, secured debt (including covered bonds), which may be linked to inflation in the Eurozone or international markets including emerging markets. The sub-fund may invest up to 10% of its net assets in units or shares of investment funds. The portfolio manager also reserves the right to invest up to 10% of the net assets in bonds with a rating below investment grade.

In order to achieve its investment objective, the sub-fund may invest in futures traded on Eurozone and international markets, including emerging markets, for exposure or hedging purposes. The other derivatives that may be used by the portfolio manager for exposure or

hedging purposes include CFDs (contracts for difference), forwards, forward exchange contracts, options (simple, barrier, binary), and swaps (including performance swaps), involving one or more risks/underlying instruments in which the portfolio manager may invest.

This sub-fund is an actively managed UCITS. An actively managed UCITS is one where the investment manager has discretion over the composition of its portfolio, subject to the stated investment objectives and policy. This sub-fund is actively managed in reference to its Reference indicator. The sub-fund's investment universe is at least partly derived from the Reference indicator in terms of allocation by region, sector or market capitalisation. The sub-fund's investment strategy is not dependent on the Reference indicator; therefore, the sub-fund's holdings and the weightings may substantially deviate from the composition of the Reference indicator. There is no limit set on the level of such deviation.

### INTENDED RETAIL INVESTOR

This sub-fund is intended for all types of investors, be they natural persons or legal entities, seeking to diversify their investment via international stocks. Given the exposure of the sub-fund to the equity market, the recommended investment period is over 5 years.

The appropriate amount to invest in this fund depends on the personal situation of the investor, their knowledge of investment products and experience, their personal wealth, their cash requirements now and in the future, and their degree of risk aversion.

### OTHER INFORMATION

Investments may be redeemed each business day on request. Subscription and redemption requests are centralised on each NAV calculation and publication day before 18:00 CET/ CEST and are executed on the next business day using the previous day's NAV.

The Depositary of the sub-fund is BNP Paribas, Luxembourg branch.

The fund prospectus and latest key information document, as well as the latest annual report are available on the website [www.carmignac.com](http://www.carmignac.com), directly from the manufacturer or on the website [www.fundinfo.com](http://www.fundinfo.com).

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator : the summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Risks to which the sub-fund may be exposed and which could lead to a fall in the net asset value to which the indicator gives too little consideration:

- Counterparty risk: the sub-fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC
- Liquidity risk: the markets in which the sub-fund participates may be subject to temporary illiquidity. These market distortions could have an impact on the pricing conditions under which the sub-fund may have to liquidate, initiate or modify its positions.

PERFORMANCE SCENARIOS

The unfavourable, moderate and favourable scenarios shown represent examples using the best and worst performance, as well as the average performance of the product over the last ten years. Markets may develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Recommended holding period:		5 years	
Example Investment:		10 000 USD	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	3 570 USD	2 250 USD
	Average return each year	-64.30%	-25.79%
Unfavourable	What you might get back after costs	6 780 USD	12 830 USD
	Average return each year	-32.20%	5.11%
Moderate	What you might get back after costs	12 800 USD	26 760 USD
	Average return each year	28.00%	21.76%
Favourable	What you might get back after costs	17 690 USD	36 670 USD
	Average return each year	76.90%	29.68%

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The figures shown include all costs of the product itself, but not necessarily all charges due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

- The unfavourable scenario occurred for an investment between June 2024 and August 2025.
- The moderate scenario occurred for an investment between June 2020 and June 2025.
- The favourable scenario occurred for an investment between December 2016 and December 2021.

WHAT HAPPENS IF CARMIGNAC GESTION LUXEMBOURG IS UNABLE TO PAY OUT?

For your protection, the assets of the fund are held with a separate entity, the custodian, so that the fund's ability to pay would not be affected by the insolvency of the management company. In the event of failure of the latter, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the product is mitigated due to the legal segregation of the assets of the depositary from those of the product.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that these costs will have on your investment.

Cost over time

The amounts shown here are the cumulative costs of the product itself, for two different holding periods. They include potential early exit penalties. The figures assume you invest 10 000,00 USD. The figures are estimates and may change in the future.

	If you exit after 1 year	If you exit after 5 years
Total costs	151 USD	2 082 USD
Annual cost impact (*)	1.5%	1.8% each year

\*The Reduction in Yield (RIY) illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 23,6% before costs and 21,8% after costs. The total costs take into account one-off, ongoing and incidental costs.

## Composition of costs

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Due to the sub-fund's exposure to the equity market, the recommended investment period is over 5 years.

However, you can redeem your investment without incurring any penalties at any point during this period, or stay invested for longer.

Redemptions are possible each business day. In exceptional circumstances, your right to request the redemption of your investment may be suspended.
