Overview

We innovate together with our customers

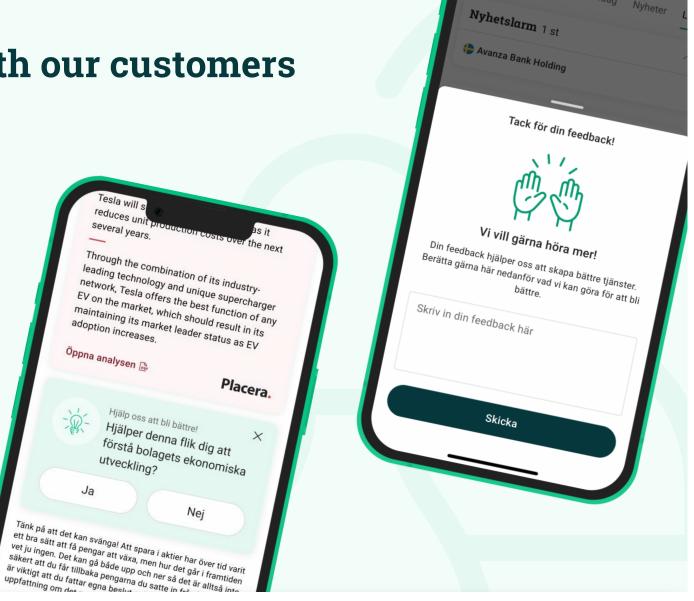

Customers can sign up for beta functionality to become test users of early releases of new features and provide feedback.

When we release a new feature, we initially roll it out only to a limited number of customers, await their feedback and make improvements accordingly, before releasing it broadly.

Our "feedback buddy" system also keeps our product teams close to the customers.

We work systematically with A/B testing, sharing insights between all product teams.

We also meet with hundreds of customers for interviews and user tests each year – and conduct surveys to understand our customers' needs.
